Vaxxitek® HVT+IBD
Winner
Best New Veterinary Product - Livestock
Animal Pharm Industry
2006 Award

Value Beyond The Label. Don’t Just Choose A Product, Choose A Company.
Features & Benefits
Vaxxitek® HVT+IBD

- **Feature:** Innovative
  - **Benefit:** Merial uses modern vectored technology to produce Vaxxitek® HVT + IBD, a safe, effective vaccine that protects your chickens from two common poultry diseases with one easy, convenient vaccination.

- **Feature:** Safe
  - **Benefit:** Vaxxitek® HVT + IBD was developed to meet the stringent safety requirements of both the U.S. Department of Agriculture and the European Medicines Agency. By using innovative vectored technology, Vaxxitek® HVT + IBD provides effective protection against Infectious Bursal Disease without the risks of bursal damage associated with using conventional modified-live-virus vaccines.

- **Feature:** Effective
  - **Benefit:** Vaxxitek® HVT+IBD has been shown to be highly effective in protecting chickens against a broad spectrum of IBD strains including classical variant and very virulent IBD (vvlBD) viruses. Vaxxitek® HVT+IBD also provides MD protection equivalent to conventional HVT.

- **Feature:** Easy to Administer
  - **Benefit:** Because it utilizes an innovative HVT vector system, Vaxxitek® HVT+IBD can be administered either in ovo or subcutaneously at day of age using existing MD vaccination systems.

- **Feature:** Convenient
  - **Benefit:** Vaxxitek® HVT+IBD is administered as a single dose in the hatchery thereby eliminating the costly, time-consuming process of vaccination in the field. Moving the vaccination process to the more controlled environment of the hatchery eliminates many of the factors in the field that can interfere with good vaccination.

- **Feature:** Reliable
  - **Benefit:** As the leading supplier of Marek's vaccines in the US, Merial offers the experience and expertise to support Vaxxitek® HVT+IBD at the same high standards you've come to expect. From quality manufacturing and dependable supply to a dedicated delivery and support staff, Merial brings more to the table than just another vaccine.
